UNIVERSITY AUSTRALIA

real training. extraordinary results.

Welcome

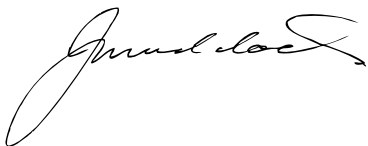

Learning is a continuous and life-long endeavour. Increasingly, educational providers are recognising that students want a variety of options and the ability to personalise the path of formal and informal education over the course of their lives and throughout their careers. While the linear progression from school to tertiary study and into the workforce remains a popular choice for some, this

straightforward pathway may take a number of twists and turns over the course of the journey. Students are becoming ever-more sophisticated in their expectations of the post-school educational experience and are understandably demanding choices that will achieve a tailored outcome. The need to gain post-school qualifications is imperative in a rapidly evolving and globalised world. The ability to diversify and build on an initial qualification is becoming increasingly important to future success in the workforce.

At Box Hill Institute, we pride ourselves on providing a variety of opportunities for students to excel academically and to gain valuable personal skills and professional experiences in their chosen field of study and beyond. Going from TAFE into university is now an established pathway for many. This option allows students to build on the 'hands-on' experience of a TAFE education with the academic knowledge gained through a university education. Both of these skills – the practical and the theoretical – are highly valued by employers of all sectors and equip graduates to be adaptable, dynamic professionals and critical and engaged thinkers.

Box Hill Institute has shared a close relationship with Deakin University for many years. This partnership is well established and diverse in its reach. Among a number of significant and ongoing collaborative projects that the two institutions have developed over the years, strong and practical pathway opportunities for students have been central. As a result, a number of clear and guaranteed pathways from our diploma and advanced diploma qualifications into a wide range of bachelor degrees at Deakin have been developed. We look forward to continuing to support students to progress along these pathways into Deakin University as many have done successfully before them.

I am proud to endorse these pathways into Deakin University and wish all our future students every success for their journey down their unique educational pathway

Mr John Maddock
Chief Executive Officer and President
Box Hill Institute

By studying at Deakin, you will receive a quality education that offers flexibility and prepares you for the real world. Our strong industry partnerships, state-of-the-art facilities and vibrant campuses will see you undertake a meaningful learning experience and guide

you to achieve your individual career aspirations.

Deakin University has a long-standing relationship with Victorian Technical and Further Education (TAFE) institutes and other VET providers. This provides special pathway programs and credit arrangements to enable you to transfer from TAFE to Deakin. In fact about 40 percent of Deakin's commencing undergraduate students come from backgrounds other than secondary school, including TAFE and the workforce.

We have a special, formal relationship with the Box Hill Institute of TAFE. This relationship has existed for many years and has enabled many students to follow a pathway that enables them to successfully complete TAFE and University qualifications.

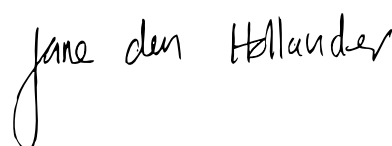

I encourage you to explore these pathways.

Students tell us that Deakin's supportive staff and friendly environment make it a great place to meet different people with new ideas. Our welcoming atmosphere also ensures that we continue to treat our students as individuals with freedom of thought and action.

Multiple course entry and exit points, deferment, and full-time and part-time study all allow you the flexibility to structure your study to suit your lifestyle, as well as your work and personal commitments. We also use innovative technology to deliver our courses including online resources like podcasts and MP3s.

At Deakin we work hard to ensure you have the best possible student experience and leave us as well-equipped and educated global citizens.

I look forward to welcoming you to one of our campuses.

Professor Jane den Hollander
Vice-Chancellor
Deakin University

Box Hill Institute and Deakin University Learning Pathways to Degrees

	Year 1		Year 2		Year 3	
Box Hill Institute VET Qualification	Semester 1	Semester 2	Semester 3	Semester 4	Semester 5	Semester 6

Saliya's journey

Saliya Gurusinghe decided to study Biotechnology at Box Hill Institute because he felt it would provide him with hands-on learning experiences which are based on real-world scenarios.

Originally from Sri Lanka, he first enrolled in our Diploma of Laboratory Technology at the Institute. He then went on to complete the Bachelor of Biotechnology and Innovation. According to Saliya, the practical sessions offered during his studies gave him an excellent insight into what to expect in the workforce.

Saliya has now moved on to complete the Bachelor of Medical Science - Honours, which is a one year researched based honours degree.

This was the next step towards working in the field of in vitro fertilisation science, which is his long-term career ambition.

Saliya comes to Australia

Enrols in and completes the Diploma of Laboratory Technology at Box Hill Institute

Enrols in and completes the Bachelor of Biotechnology and Innovation at Box Hill Institute

Enrols into a Bachelor of Medical Science - Honours at university level
